1. SITE ANALYSIS

SITE LANGUAGE

Brief site history:

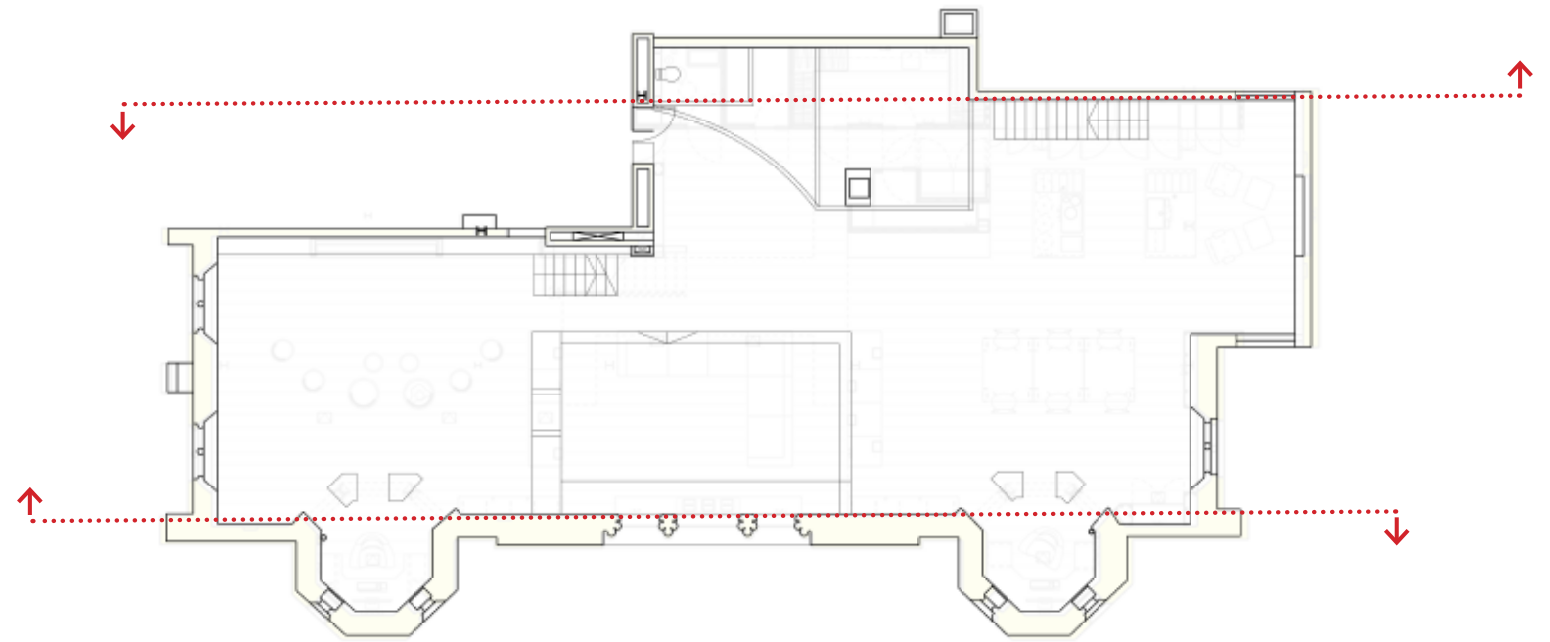

- . Victorian Gothic church built in 1853
- . Damaged in 1940 during the blitz
- . Redeveloped in 2002

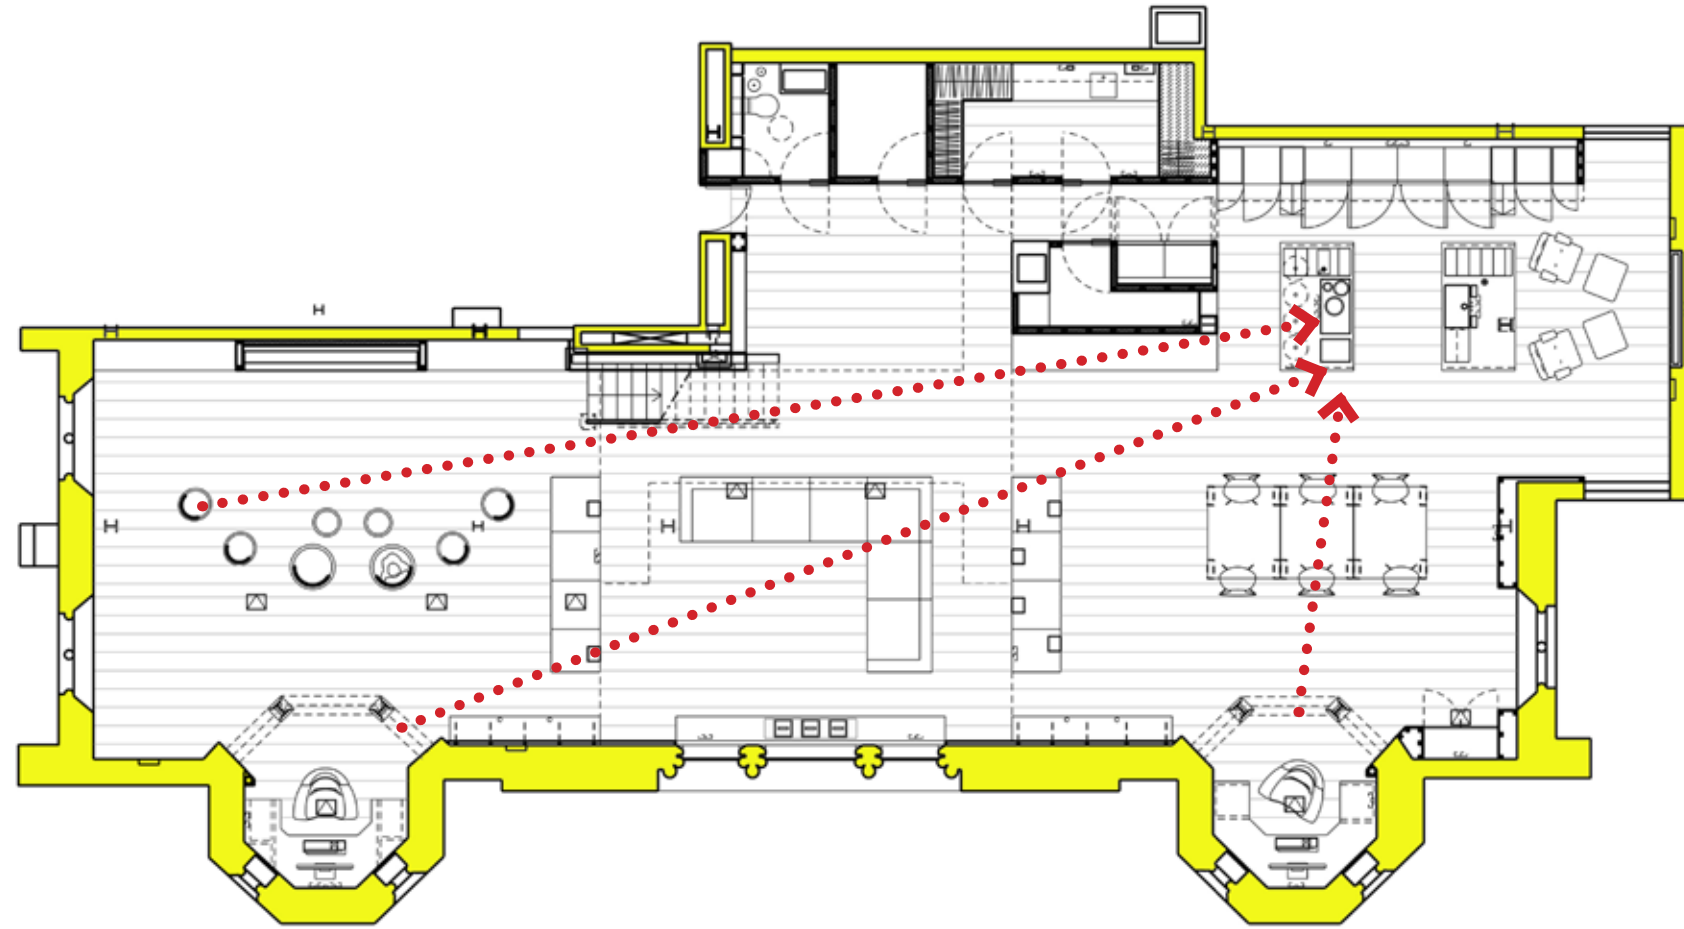

Exterior:

- . Striking gothic architecture and features
- . Original tall stone windows and stone facade retained

Interior:

- . Random characterless interior
- . Walls not aligned
- . Steel columns in awkward places
- . Mix of ceiling heights

2. CLIENT'S BRIEF

INITIAL REQUIREMENTS

Visual Contact:

- . all areas of the apartment to be visible from the kitchen
- . kitchen to be unobtrusive and uncluttered

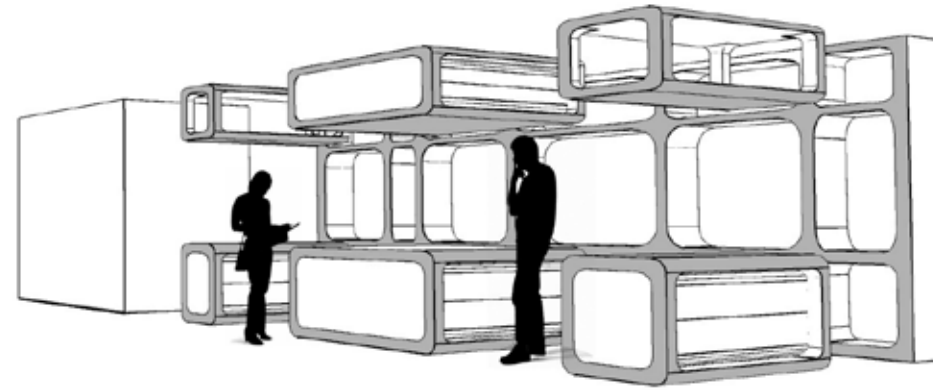

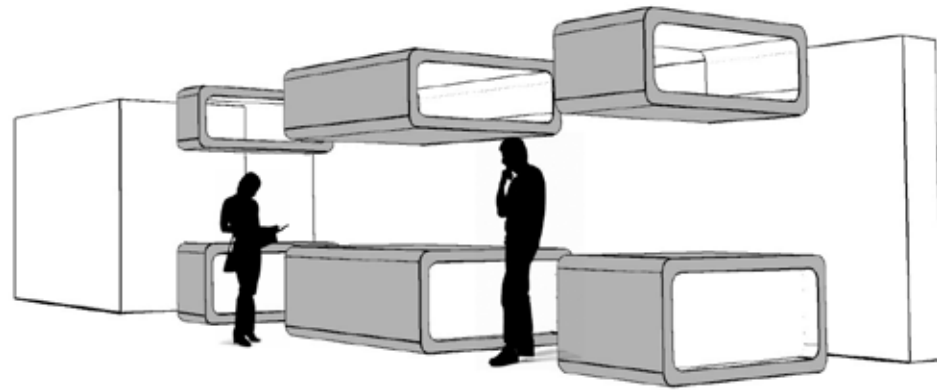

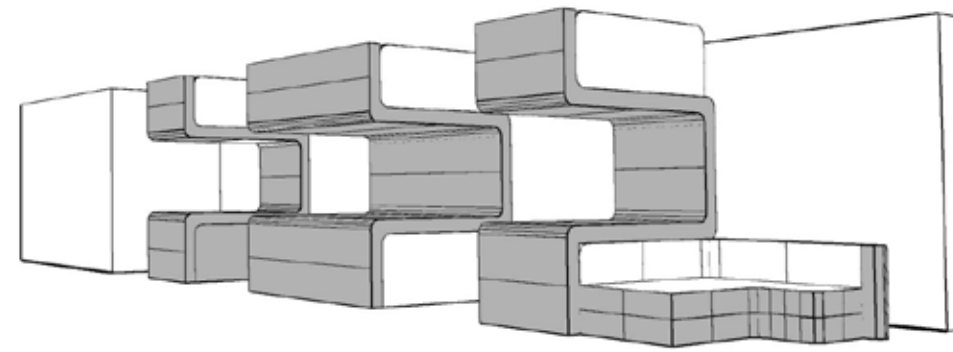

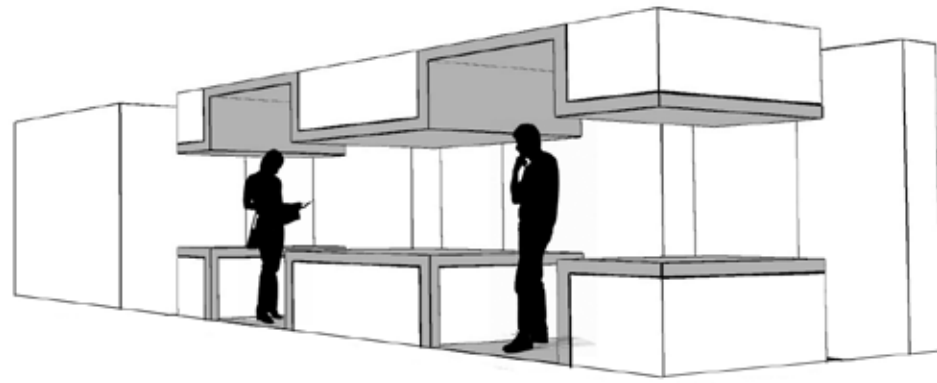

Minimalist:

- . simple, uniform, clean and precise lines
- . contrast with the Victorian Gothic architecture

Functional:

- . client enjoys cooking with family and friends.

3. DESIGN DEVELOPMENT EARLY PROPOSED IDEAS

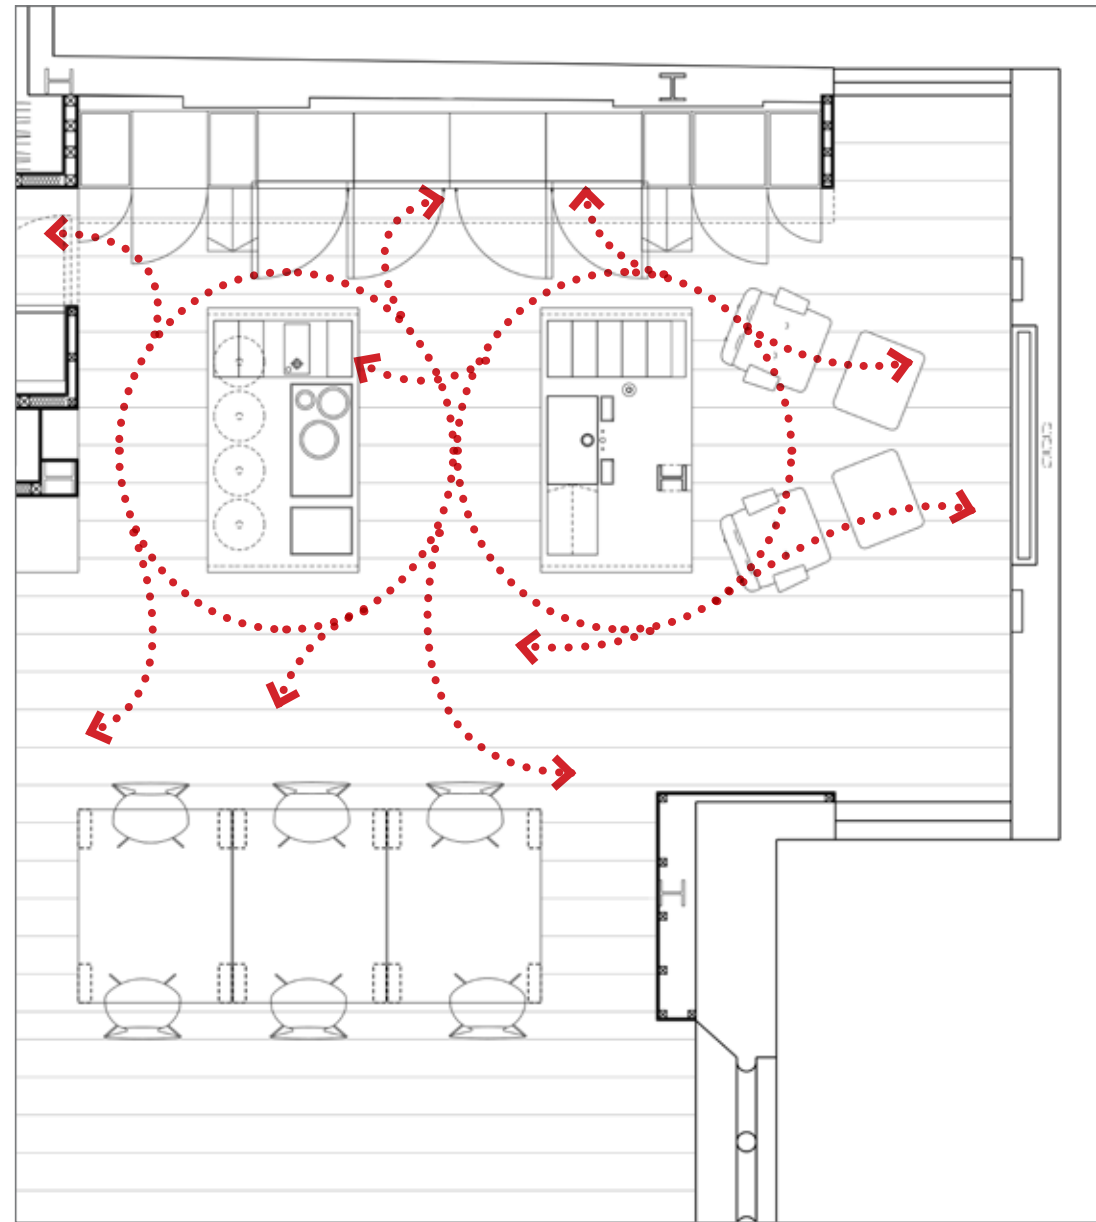

Initial Concepts:

- . used overhead storage units to connect islands
- . explored use of more unusual materials (e.g. polished aluminium)

ALIGNMENT PLAN

CIRCULATION PLAN

3. DESIGN DEVELOPMENT

KITCHEN AREA ANALYSIS

Layout:

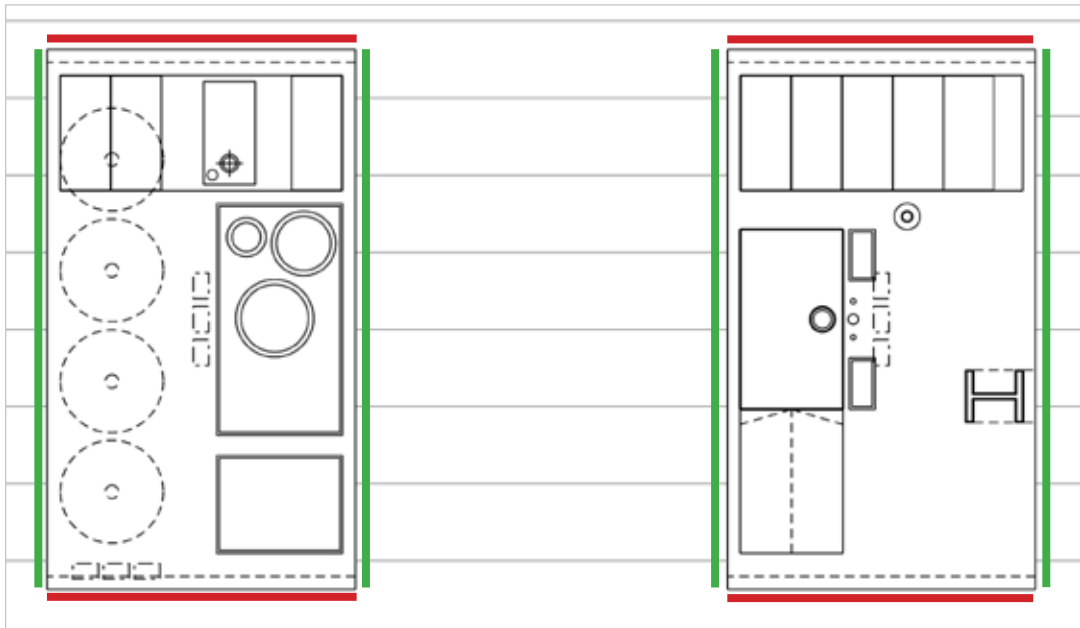

- . kitchen design provides a link between the existing structural steels, new architectural details and the interior design
- . islands define the kitchen area in large open spaces
- . islands facilitate efficient movement around the kitchen

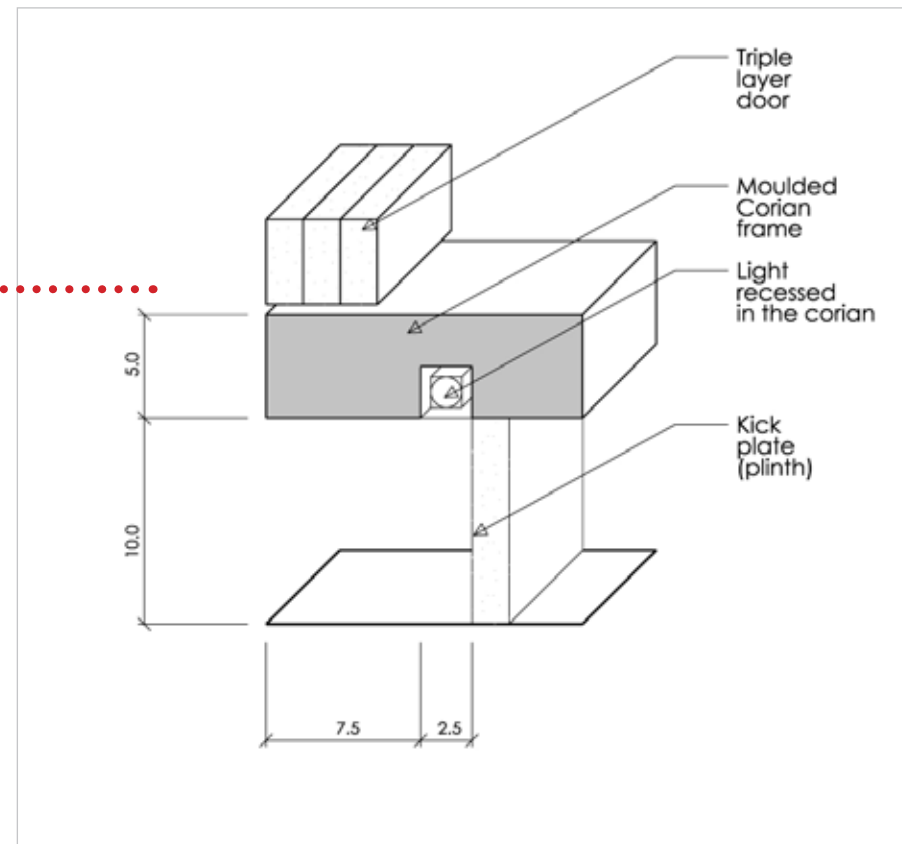

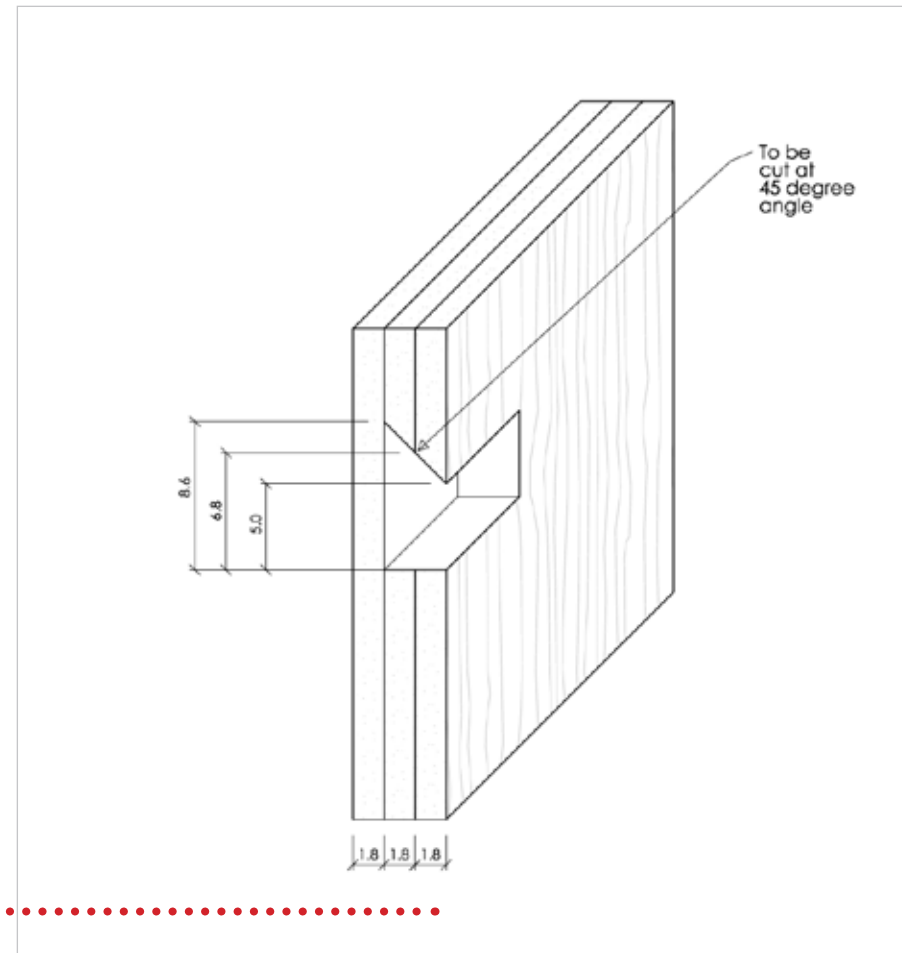

3. DESIGN DEVELOPMENT

ISLAND ANALYSIS

The 'framed' island:

- . clean sides face the dining room to define the end the kitchen working space
- . plinth lighting gives the impression of 'floating' islands
- . provides a frame for the clean lines of the drawers

3. DESIGN DEVELOPMENT EARLY DETAIL PROPOSALS

Details:

The manufacturing details enhance the solid appearance of the design;

. frame is manufactured from Corian to provide a solid colour throughout

. frame is 50mm thick on top, sides and bottom

. sinks are in Corian

. doors are 36mm thick and colour matched to the Corian

. deep inset handles to facilitate easy opening

. kick plate is set low (50mm) and well back to enhance the lighting effect

3. DESIGN DEVELOPMENT FINAL VISUALS

Final CGI's prior to manufacture:

- . the kitchen is unobtrusive and uncluttered
- . minimalist with simple, uniform, clean and precise lines
- . extremely functional and social

4. FINAL PROPOSAL FEATURE LOCATION

Storage wall:

1. Pull out glass rack.
2. Free standing fridge.
3. Pull out dried goods rack.
4. Storage.
5. Fridge + storage.
6. Freezer + storage.
7. Storage.
8. Pull out dried goods rack.
9. Full height storage unit.
10. Full height storage unit.
11. Inbuilt microwave
12. Inbuilt oven.

Island 1 (left):

13. Storage: drawers of different sizes.
14. Storage for pots and pans.
15. Storage: drawers of different sizes.

Island 2 (right):

16. Pull out dish washer, divided into two parts.
17. Under sink storage.
18. Pull out dish washer, divided into two parts.

4. FINAL PROPOSAL

KEY DETAILS

We went to great lengths to ensure that the worktops would remain uncluttered and always maximise functionality.

1. The fully open prep sink.
2. The tap has been pushed down
3. Part of the cover has been placed over the sink.
4. The sink has been totally covered and can be used as working space.

4. FINAL PROPOSAL

KEY DETAILS

1. Handles are recessed, but practical. They are set into 36mm thick doors, which enables easy opening of heavy integrated appliances. The doors are laquered to match the colour of the counter top, which is Glacier White Corian.

2. Every item has been allocated effective storage to avoid cluttered worktops. An example are these hanging glass racks made from Corian and fixed in a pull out unit. Even the toaster is set on a pull out shelf behind a door - with a fire retardant lining recessed into the shelf above.

3. Corian sinks help retain the clean seamless look. The deep stainless steel inset compartments behind help keep soap and cloths out of site.

4. Hidden drawers add functionality without having to break the lines of the design.

5. A zip tap removes the need for a kettle to be kept on the worktop.
